Porsche Cars North America, Inc.
980 Hammond Drive
Suite 1000
Atlanta, Georgia 30328
1-800-PORSCHE

December 5, 2008

Eade J. Hopkinson
2011 Crest Drive
Encinitas, CA 92024-5219

Dear Hopkinson,

Just like you, your Porsche is an original, offering an unparalleled driving experience. You belong together, linked by distinction, admired by many.

Since the inception, the objective of the Porsche engineers was clear: to create a sports car without compromise, one to enjoy the open road without impediment, a car that makes the spirit of the racetrack almost tangible. This philosophy has been designed into every Porsche we build. Every trip is an unforgettable pleasure of pure driving exhilaration, one of precise handling, direct response and unmatched performance. The Porsche heritage is born from racing wins, legendary technology and world-class quality.

We are pleased to present you with a Certificate of Authenticity for your Porsche. This unique document includes your vehicle's original factory-installed options, production completion date and manufacturer's suggested retail price (MSRP), if available. This can prove to be an essential tool for restoration, resale and for display of your Porsche at official Porsche events.

Please carefully examine your Certificate. If you have any questions concerning your Certificate, please call 1-800-PORSCHE option 5 or, if you prefer, send an email to coa@porsche cars.com.

Wishing you a lifetime of rewarding journeys,

Detlev von Platen
President and Chief Executive Officer

I hereby authorize the repair work listed hereon, including sublet work, to be done along with necessary materials. You and your employees may operate the described vehicle for purposes of testing, inspection or delivery at my risk. An express lien is acknowledged on said vehicle to secure the amount of repairs thereto. You will not be held responsible for loss or damage to vehicle or articles left in vehicle in case of fire, theft, accident, or any other cause beyond your control. Customer agrees to pay all collection costs and/or attorney's fees in the event default is made in any payment due. If automobile is returned to customer without repair service being performed, a diagnostic and handling fee (including reassembly) may be charged. I have read and understand the above and acknowledge receipt of an estimate.

Porsche Certification of Authenticity

Clean and Clear Title

Vehicle Located in Ohio

This is a very unique and special early 911S. The owner that had this car restored is a well-known early 911 enthusiast out here on the west coast. He has a reputation for having very nice cars and spending the necessary money to restore these cars properly. He purchased this car several years ago from a local man who was the 4th owner. The current owner did some research to track down the history of this car.

The car was originally sold new to a Surgeon in Illinois. He purchased the car from a Porsche dealership in Chicago. He owned the car for 10 years. We do not have any information on the 2nd owner. The third owner was from San Francisco and purchased the car with the thought of using it for vintage racing (I know, it is painful to hear). Fortunately, he realized it was too nice and original of a car to use for that and after some time sold it to the 4th owner.

The mileage is original and when the engine was being rebuilt, the condition of the bearings, crank, and other internal bits confirmed this.

The next owner's intention with this car was not to make it a PCA concours car, but rather a very nice example that would be true to original as well as being reliable to take on long drives and simply enjoy. Because the condition of the original trim, interior, and other bits and pieces was in such good shape, his goal was to retain as much originality as possible to help preserve the car's history.

Although the car ran great, it did have a bit of smoke on startup, so his first step was to do a simple valve job and tighten things up. Well, nearly \$25,000 later (we all know that slippery slope), everything mechanical had been completely redone. Also, he enhanced the reliability with correct and better parts when he could. Here is an outline of the mechanical restoration:

Engine:

Complete engine rebuild.

Crank was perfect and was only polished

All bearings were perfect when the motor was opened (to verify mileage)

New valves

New bearings and custom rings

Honed cylinders

930 chain tensioners

New upgraded oil pump

Webers completely rebuilt

Fan is original magnesium and restored

New timing chains, rocker arms and shafts

New motor mounts

SSI Stainless Steel Heat Exchangers

Tranny:

Transmission completely rebuilt with all new factory gears with a shorten 3rd, 4th, and 5th (A=1st, F=2nd, K=3rd, Q=4th, V=5th). Not quite airport gears, but certainly more fun drive with top speed at 125mph

New clutch, pressure plate, throw out bearing, and resurfaced flywheel

Suspension and Brakes:

New Koni shocks

Completely rebuilt suspension with correctly powder coated parts

All new bushings

New factory axles.

Brakes restored (rebuilt calipers),

New brake lines

New Turbo tie-rods

Since the drive train was completely out, the next step was to do the paint. When this owner purchased the car, it had been repainted white some 20+ years prior. After researching the car, he came to find out that the original color was Bahama Yellow (one of his favorite). So, this was a must for him. When they took the windshield out of the car and pulled back the seals on the A-pillar, they found the original paint as it left the factory and had never seen the light of day. So, they had a representative from Glasurit come out and custom blend the color to get the exact correct shade. Best of Show Coachworks near San Diego, CA was hired to do the paintwork. They are known for some amazing Pebble Beach Concours winning cars and treat every job that way. Needless to say, nearly \$50,000 was spent on the body. They carefully removed all the trim and glass to preserve it. Here is a detail of the bodywork performed:

Body:

Stripped down and to bare metal

Soda blasted on the bottom and fender wells

Hand stripped on top to bare metal

Glasurit Paint matched at Glasurit Library and custom mixed to ensure exact match to original paint found behind Windshield molding on A-pillar.

Excellent Gaps

Exterior rubber/gaskets was replaced.

Original bumper/deco rubber/molding kept for originality purposes.

Grill is original and unrestored.

NOS complete headlight assembly correct for 1967

Badges are all original and unrestored.

Stainless Targa Bar is all original and not restored.

Wing windows rechromed.

New Windshield

Rest of glass is original

New trunk and door moldings

New Targa bar and Targa top seals replaced with correct seals

Wheels are original to the car and refinished correctly by Harvey Weidman with 5 brand new 165 15 HR Vredestein tires installed.

Windshield wiper reservoir was cracked and we couldn't locate an original one but have included a later one that would need to be modified to fit.

Fog lights are original and unrestored. They do not work.

Original door handles

Original side mirror

The final step to the process was the interior. Now remember, the goal here was to not make a concours car but a very nice car that could be enjoyed and easily brought up to concours level at a later date. We discussed the interior at length and finally decided to keep it mostly original. It really tells the story of the car and shows that the car was really well cared for its entire life. Since it is the part most owners really experience the most about the car, we loved the original look at feel of it while driving. The only significant element that was done on the interior was the carpet. Here is a list of the details:

Interior:

Mostly original to preserve authenticity.

The vinyl around the windshield and inside of the roll bar was redone by Autos as well as a complete carpet set.

The door tops were done to original spec.

Sun visors original

The dash, radio (which does not work), door panels and knee pad all original and unrestored

Gauges are original and were restored.

New correct antenna

Original soft window targa boot is original with the carry case

Original Interior Tonneau cover included (no snaps installed).

Original jack and original complete toolkit.

Extended hub steering wheel

Webasto heater included but not installed

NOS Rear view mirror

New correct seatbelts installed with original seatbelts included

Also, we have a NOS (and very rare) headliner for the targa top if someone wants to restore it in the future.

Factory Options:

Webasto Heater

Antenna

Loudspeaker

Tinted Windshield & Side Glass

2 Pair of Seatbelts

Dunlop Tires (165/15)

Finally, included with this 911S are some great additional items:

Original factory Shop Repair Manual

Original factory Shop Service Manual

Complete set of Blaupunkt radio manuals and wiring guides

Porsche distributor and dealer pamphlet

Porsche Targa supplemental/annex manual plus one near new extra

Original Porsche Service Book with dealer stamps

Original Porsche Accessories Book

Two Original Porsche 911S Owners manuals (one published in 1966 and one published in 1967)

All the owners of this Porsche were true enthusiasts and created a large binder with any press information pertaining to the 1967 911S. Many of these items date back to 1967 and are a great story of the vehicle from being tested as a new car to impressions as a classic collector car.
