# CARFAX Report

US $44.99

**VIN:** WDB1240921F312194

1 Detailed Record Available

This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 5/21/26 at 10:12:31 AM (CDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

## CARFAX Additional History

Not all accidents / issues are reported to CARFAX

| | Summary |
|---|---|
| **Total Loss**<br>No total loss reported to CARFAX. | No Issues Reported |
| **Structural Damage**<br>No structural damage reported to CARFAX. | No Issues Reported |
| **Airbag Deployment**<br>No airbag deployment reported to CARFAX. | No Issues Reported |
| **Odometer Check**<br>No indication of an odometer rollback. | No Issues Indicated |
| **Accident / Damage**<br>No accidents or damage reported to CARFAX. | No Issues Reported |
| **Manufacturer Recall**<br>Check with an authorized dealer for any open recalls. | **Ask Your Dealer** |
| **Basic Warranty**<br>No data reported to CARFAX. | No Data Reported |

## CARFAX Title History

| | Summary |
|---|---|
| **Damage Brands**<br>Salvage \| Junk \| Rebuilt \| Fire \| Flood \| Hail \| Lemon | No Problem |
| **Odometer Brands**<br>Not Actual Mileage \| Exceeds Mechanical Limits | No Problem |

## CARFAX Detailed History

## CARFAX Glossary

**Title Issued**
A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

## VEHICLE ASSESSMENT [6]

**Overall Collision Safety Ratings**

| Driver's seat | | | Front passenger's seat | | |
|---|---|---|---|---|---|
| Points | Evaluation | Goal average | Points | Evaluation | Goal average |
| 0 | | 0% | 0 | | 0% |

* In order to accurately differentiate between the evaluations of different vehicles, a standard is set based on current technology. Up to 6 points out of 12 is given level 1 and the rest of the range is divided up into equal parts, which are respectively assigned to level 2 (more than 6 points but 7.5 or less), level 3 (more than 7.5 points but 9 or less), level 4 (more than 9 points but 10.5 or less) or level 5 (more than 10.5 points).

**Braking performance tests** [7]

Dry road

Wet road

## VEHICLE SPECIFICATION

| | | |

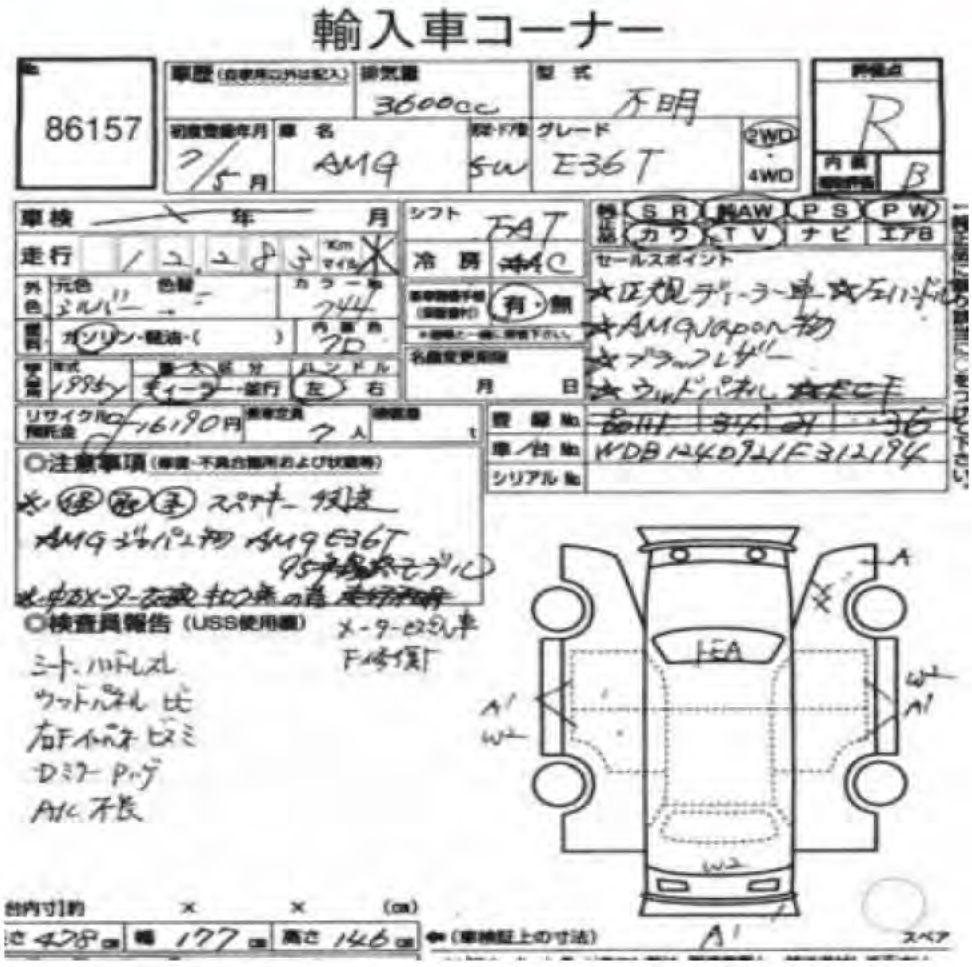
| **Width** | 177 | | |

## AUCTION DATA

**Date: 2018-05-15, Auction: USS Yokohama, Lot #: 86157**

| | | | |
|---|---|---|---|
| Date: | 2018-05-15 | Lot #: | 86157 |
| Auction name: | USS Yokohama | Region: | Kanagawa |
| Make: | MERCEDES BENZ | Model: | E CLASS |
| Reg. year: | 1995 | Mileage (km): | 12283 |
| Displacement (cc): | 3600 | Transmission: | FAT |
| Color: | SILVER | Model code: | |
| Result: | available | Auction grade: | R |
| Problem type: | Collision | Problem scale: | Repaired |
| Contaminated: | No | Airbag: | OK |

## PHOTOS AND AUCTION SHEETS



## GLOSSARY

[1] **Chassis number** – a unique identification number of the vehicle in Japan (same as VIN in the USA or Europe)

[2] **Title information:**
Registered – qualified for driving in Japan
Deregistered Temporarily – not qualified for driving in Japan, usually a temporary title during the ownership change
Deregistered Completely – not qualified for driving in Japan, the vehicle is determined to be scrapped
Deregistered to Export – not qualified for driving in Japan , the vehicle is determined to be exported

[3] **Determining the overall collision safety performance evaluation** – For the driver's seat, the results of the full-wrap frontal collision test, offset frontal collision test, and side collision test are added together and evaluated to 6 different levels. For the Frontal passenger's seat, the results of the full-wrap frontal collision test and the side collision test (results for the driver's or the front passenger's seat are used) are added together and evaluated to 6 different levels.

Regular vehicle inspection – All vehicles in Japan must undergo regular vehicle inspections (shaken). New cars need to be tested after three years, and then vehicles must be tested every two years thereafter. A vehicle inspection (shaken) is compulsory for all vehicles with an engine size over 250cc. It ensures that all vehicles on the road are properly maintained and safe to drive. The test also checks that vehicles have not been illegally modified; if they are found to have been modified, they are not allowed on the road.

[4] **Use in the contaminated regions** – The Fukushima Daiichi nuclear disaster was a catastrophic failure at the Fukushima I Nuclear Power Plant on 11 March 2011, resulting in a meltdown of three of the plant's six nuclear reactors. As a result, some areas in the following prefectures were contaminated: Fukushima, Miyagi, Ibaraki, Tochigi.

[5] **Radioactive contamination test** – radioactive contamination inspection that was started in July 2011 as a preventive measure for exporting contaminated vehicles from Japan. The inspection is being conducted since in all sea ports of Japan under the supervision of The Japan Harbor Transportation Association (JHTA).

MLIT – Ministry of Land, Infrastructure, Transport and Tourism.

[6] **Japan New Car Assessment Program** – the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) and the National Agency for Automotive Safety & Victims' Aid (NASVA) have taken measures for safety, one of which is to assess commercially available vehicles through a variety of safety performance tests and release the resulting information compiled into the "New Car Assessment Program". The objective of Japan New Car Assessment Program is to increase the use of safe automobiles by providing an environment in which users can easily select such vehicles. This also promotes the development of safer vehicles by automobile manufacturers. Neck injury protection for rear-end collision performance test , rear seat passenger's protection for frontal collision performance test, rear passenger's seat belt usability evaluation test and seat belt reminder for passengers evaluation test are started in FY2009.

[7] **Braking Performance Tests** – Braking performance is determined by the shortness of the distance in which a vehicle can stop and the stability of the vehicle at the time of braking. This test is performed under wet and dry road conditions for a vehicle which has both a driver and a front passenger. The distance it takes for the vehicle to stop and the stability of the vehicle at the time of braking is evaluated for when the vehicle is stopped abruptly while traveling at a speed of 100km/h. The stopping distance and vehicle speed have been measured by using GPS since FY2009.

CAR VX, LTD DEPENDS ON ITS SOURCES FOR THE ACCURACY AND RELIABILITY OF ITS INFORMATION.

THEREFORE, NO RESPONSIBILITY IS ASSUMED BY CAR VX, LTD OR ITS AGENTS FOR ERRORS OR OMISSIONS IN THIS REPORT. CAR VX, LTD FURTHER EXPRESSLY DISCLAIMS ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

# Auto Critic Inc.

1336 S Federal Hwy
Pompano Beach FL 33062
(954)786-7086
F(954)786-7084

1995 M-Benz E36 Wagon (Japan)
WDB1240921F312194

2/22/2021 – Vehicle Towed to Auto Critic : Current Mileage 12588
Customer states vehicle has no Reverse.
Start Vehicle to check for Reverse, Car Stalled During Test drive, would not stay running longer than 1-2 Mins, Was able to check that vehicle has No reverse. Pull car into building to drop transmission pan and inspect for metal shavings. Found pan filled with metal shavings.

2/24/2021- Vehicle Towed to transmission repair shop for transmission rebuild
When transmission rebuild was complete (4 weeks later, due to hard to get parts) tried to test drive car and the car would not run for longer than 1- 2 mins and would shut off.

3/24/2021- Vehicle towed back to Auto Critic Inc. Tried to drive car and car would not stay running. Start Diagnostic on why car wont stay running. Upon Inspection we found the Crankshaft Position Wiring compromised, it was broken and exposed. We Believe this compromised wire shorted a component in the Engine Control Unit. DIAGNOSTIC TOOK DAYS ! No information / Diagrams are available for this car.

4/5/2021- Remove Engine Control Unit and ASD Relay to send out for Inspection / Repair.
4/14/2021- Update – Waiting on special order parts from overseas for control unit repair.

4/27/2021- Picked up Engine Control Unit w/ OHM control Box to set Engine Control Unit. NO GUARANTEE ON REPAIR:: Vehicle started and we were able to drive vehicle for 2 Days and test transmission rebuild, vehicle now has reverse.

4/29/2021- Notified Customer to come and pick up vehicle and customer let us know he would pick up the car the following day (Friday 4/30/2021).

4/30/2021 – Customer did not show up:: Parked Vehicle in the building on Friday for the weekend. Upon returning to the shop on Monday (5/3/2021) Vehicle would no longer start, just cranks.

5/3/2021 – Notified Customer that the vehicle no longer runs.

Current Mileage 5/3/2021 :: 12603
Vehicle Drove 15 Miles Total

8/27/2021 – RELEASE OF RESPONSIBILITY – Auto Critic Inc is not responsible for the current operation of the vehicle but is more than willing to help try to get the car running.
