	DIAGNOSE	DIAGNOSE- Remove fuel level sender in order to inspect fuel tank. No debris or "varnish" seen in fuel tank. Drained remaining fuel, replaced fuel filter, and added new fuel to run car. Noticed coolant level low. Pulled spark plugs in order to check for coolant in cylinders. Cranked car over and no coolant found in cylinders. Reinstalled spark plugs. Started car and ran. Found fuel pressure regulator had vacuum line plugged off and	360.00	360.00

	LABOR	LABOR-Major problems with exhaust manifolds. Head	1,800.00	1,800.00
		removed with stock exhaust manifolds still attached. Manifolds		
		removed after head off of car. Very difficult to removestuds		
		damaged on threads. Exhaust gaskets had been leaking at head.		
		Replaced exhaust studs. Manifolds would not fit over studs to		
		reattachseverely heat distorted. Manifolds no longer		
		available and no one had any remaining stock. Rose Passion		
		had "replacement/non factory" manifolds, but not satisfactory		
		for this car. Work with manifolds to fit on the head, but		
		manifold would not fit flat and had visual leakage. Finished the		
		head installation and ran the car, to see if the manifolds would		
		get hot and fit better. No luck. Finally removed the head, for a		
		second time, and worked extensively to get manifolds to sit flat		
		enough on the head to not leak. CRAZY amount of work!	225.55	225.22
